

PART NUMBER

0541-1195-01 SAE J1939 Network Interface Module

0541-1195-03 SAE J1939 Network Interface Module

Spec Sheet Description

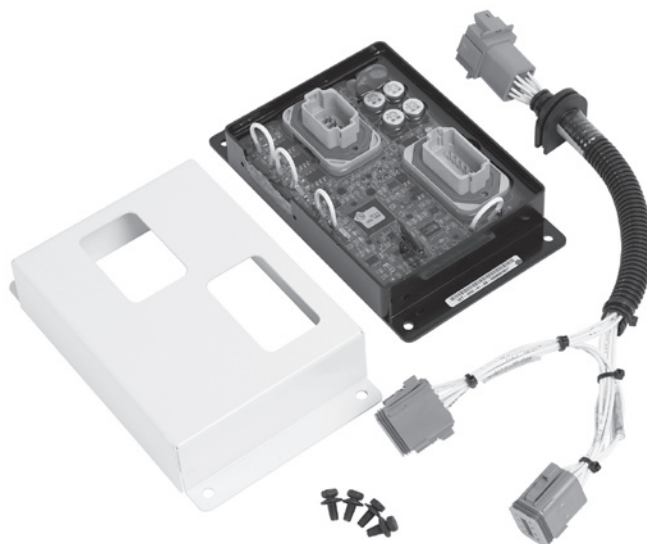

SAE J-1939 CAN data link

Description

If the network interface module is not ordered with the genset, this kit makes it easy to add it in the field.

Benefits

Provides genset information on a J1939 data link for monitoring generator set status and diagnostics for engine and alternator. Transmitted data includes: AC voltage, AC frequency, coolant temperature, oil pressure, battery voltage, hours, pre-alarm and fault information.

0541-1195-01

Compatibility

Part No.	Models
0541-1195-01	MDKBH/J/W
0541-1195-03	MDKBK/L/M/N/P/R/V/T/U

Installation

Kit 0541-1195-01 mounts to the outside of the sound shield (see outline drawing for more information). A SAE J1939 capable display needs to be programmed to display genset information.

Kit Includes

Network interface module, harness, mounting hardware, and instruction sheet.
