

ZIPWAKE KIT BOX 450S

Product description:

ZIPWAKE KIT BOX 450S DYNAMIC AXIS

ZIPWAKE box 450s is a complete ready-to-use dynamic boat attitude control KIT that contains:

- 1 Control Panel with 7 mt of standard cable
- 1 Distribution Unit with 4 mt of power cable
- 2 Interceptors 450s with 3 mt of cable and cable cover
- 1 extension cable of 1.5 meters

Any basic installation can be expanded with up to two extra pairs of S-series interceptors, resulting in a total of six interceptors without the need for additional connectors or power supplies.

COMFORT AND SAFETY ZIPWAKE box 450s

Dynamically eliminates pitch and roll from boats, increasing comfort and safety on board.

PERFORMANCE AND FUEL SAVING

Automatically minimizes wave resistance and saves fuel; in fact, the roll and resistance offered by waves is one of the main causes of strain on boat engines.

INTUITIVE AND PRECISE

Innovative 3D controls provide unparalleled control of trim and direction of travel

ZIPWAKE box 450s: DURABLE AND EFFECTIVE

The patented series of fast-acting, durable interceptors provide top performance that will last for years.

COMPLETE AND COMPETITIVE

The all-inclusive, mass-produced modular design offers built-in quality, simple installation and easy expansion, making the system easy to use by even the least experienced.

Swedish manufacturer's Interceptors Zipwake are trim correctors that mitigate boat roll while underway, correct pitch and trim while sailing, and save fuel. The current range of Zipwake Interceptors are suitable for boats from 20 to 60 feet (6 to 18 meters), electrically powered, and easy to install even on boats that are not new construction.

ZIPWAKE Interceptors are available in four lengths (350 mm, 400 mm, 450 mm and 600 mm) and can be combined according to the size and shape of the keel: a maximum of 6 can be installed per boat, connecting them to the same electronic control unit which is in turn controlled by a digital control panel with an integrated gyroscope that automatically sends the impulse to the Interceptors to correct the trim. The response is very fast, the system can be configured with 1, 2 or 3 control stations.

Product features:

Voltage (V): 12 - 32

Power cable length (m): 4 +7 +1.5

Length (mm): 155

Width (mm): 680

Height (mm): 275

Product type: Dynamic Trim Control System

Weight (Kg): 7
