

ZIPWAKE KIT BOX 600S

Product description:

ZIPWAKE KIT BOX 600S DYNAMIC ASSET CONTROL SYSTEM FOR BOATS

ZIPWAKE KIT BOX 600S is a complete ready-to-use dynamic boat attitude control KIT that contains:

- 1 Control Panel with 7 mt of standard cable
- 1 Distribution Unit with 4 mt of power cable
- 2 Interceptors 600s with 3 mt of cable and cable cover
- 1 extension cable of 1.5 meters

Any basic installation can be expanded with up to two extra pairs of S series interceptors, thus obtaining a total of six interceptors without the need to purchase additional connectors or power supplies; in fact, those contained in the ZIPWAKE box 600s kit are sufficient.

COMFORT AND SAFETY ZIPWAKE box 600s

Eliminates pitch and roll of the vessels dynamically and in real time, increasing comfort and safety on board.

REDUCED PERFORMANCE AND FUEL CONSUMPTION

Automatically minimizes wave resistance; the roll and resistance offered by waves is one of the main causes of strain on boat engines.

Thanks to ZIPWAKE box 600s you will see significantly reduced fuel consumption.

INTUITIVE AND PRECISE

Innovative 3D controls provide unparalleled control of trim and direction of travel to dominate the waves.

ZIPWAKE box 600s: DURABLE AND EFFECTIVE

Patented series of fast-acting, durable interceptors provide exceptional performance and great durability.

COMPLETE AND COMPETITIVE

The all-inclusive modular design offers high quality, simple installation and ease of expansion, making the system cost-effective and usable by even the least experienced.

Swedish manufacturer's Interceptors Zipwake are trim correctors that mitigate boat roll, correct pitch and navigational trim and save fuel. Zipwake's 2020 range of Interceptors are suitable for boats from 20 to 60 feet (6 to 18 meters), electrically powered and easy to install on older or newer boats.

ZIPWAKE Interceptors are available in four lengths (350 mm, 400 mm, 450 mm and 600 mm) and can be combined according to the size and shape of the keel: a maximum of 6 can be installed per boat, connecting them to the same electronic control unit which is in turn controlled by a digital control panel with an integrated gyroscope that automatically sends the impulse to the Interceptors to correct the trim. The response is very fast, the system can be configured with 1, 2 or 3 control stations.

Product features:

Voltage (V): 12 - 32

Power cable length (m): 4 + 7 + 3

Length (mm): 155

Width (mm): 980

Height (mm): 275

Product type: Dynamic Trim Control System

Weight (Kg): 10.6
