Product description:

DOMETIC PerfectCharge MCA1250

Starter batteries and supply batteries are designed for different tasks. To start the engine, starter batteries must initially supply a high current level and will then serve as an energy buffer with smaller partial cycles. Supply or on-board batteries, in contrast, are discharged at lower current levels over longer periods of time and then charged again. This means they are subjected to considerably higher loads. These special features must be considered by the charging technology to protect the batteries from damage and ensure they have a long service life. The IU0U battery chargers function using a unique six-stage charging cycle. They provide optimum charging for all gel, AGM and wet batteries, because they charge quickly and gently at the same time.

Product features:

Frequency (Hz): 50 / 60

Voltage (V): 110 / 230

Protection degree: IP20

Effective current (A): 5.5

Output voltage (V): 12

Nominal current (A): 50

Battery type: Piombo, AGM, Gel

Length (mm): 283

Width (mm): 208.5

Height (mm): 75

Dry weight (Kg): 3.1

Continuous power (W): 735

Product type: Battery Charger

Number of battery outlets: 3
