

RENTAL LUXTOWER LUX B12H LED

Product description:

LUX B12H is a latest generation hybrid lighting tower equipped both with an integrated generator and also powered by an integrated battery pack, it comes with 4x150W LED floodlights mounted on a galvanized vertical telescopic mast with hydraulic lifting system.

This machine is the ideal solution for long working session, when it isn't often possible refueling the tank or in case any external power sources can be used or where the silence is required, as a work site in a city center.

This machine has an incredible RUNNING TIME of about 960h with 86% fuel savings compared to traditional lighting towers with integrated generator.

LUX B12H features a range of high-end optional such as twilight sensor, bounded tank, automatic mast lowering system (AMOSS KIT) and homologated fast tow trailer. Technologies that make it a top range product.

The image is purely indicative.

Product features:

Phase: Single phase

Maximum power single phase (KVA): 3.5

Fuel: Diesel

Voltage (V): 230

Engine: KUBOTA Z482

Engine rpm (rpm): 1500

Number cylinders: 2

Cooling: Water

Alternator: Linz or Mecc Alte
