Product description:

BINDA LWG2 Motor pump 660 Litres per minute

LWG2 motor pump with a maximum flow rate of 660 litres/minute, with a maximum head of 24 metres and a suction height of 7 metres.

The LWG2 660 litres per minute motor pump is self-priming monobloc open impeller with 4-stroke petrol engine.

The built-in check valve of the suction inlet prevents the siphon effect from stopping and ensures automatic re-priming, at each start the pump will re-prime even if only partially filled with liquid and with the suction hose completely empty.

Used in the drainage of clean or slightly dirty water, in flow irrigation and drainage works.

Technical data of LWG2 660 litres per minute:

Suction delivery: 50 mm - 2".

Engine revs: 3200 rpm

Maximum flow rate: 660 Lt/1'

Maximum head: 24 m

Suction height: 7 m

Engine: Loncin, 4-stroke

Fuel: Gasoline

Tank capacity: 3.6 Lt

Starting: manual

Length: 550 mm

Width: 430 mm

Height: 390 mm

Weight: 32 Kg

If you are looking for motor pumps similar to the LW100 1600 liters/minute but with different technical characteristics then we suggest you to browse our wide catalogue reserved to motor pumps.

The motor pumps can be gasoline or diesel powered, and depending on its use are in fact available with the following types: high flow, portable, high pressure, self-priming with simple effect.

Images and technical data are not binding.

Product features:

Fuel: Gasoline

Engine: 4 stroke

Engine rpm (rpm): 3200

Starting system: Manual

Number cylinders: 1

Pump type: Lightweight Pump

Fluid type: Clean water

Height of suction (m): 7

Maximum output capacity (Lt/min): 660

Outlet diameter thread type (mm/inches): 50 mm - 2"

Total head (m): 24

Fuel tank capacity (L): 3.6

Length (mm): 550

Width (mm): 430

Height (mm): 390

Dry weight (Kg): 32

Product type: Motopompa
