Product description:

DOMETIC SINEPOWER VS230 PRIORITY CIRCUIT

DOMETIC SINEPOWER VS230 is designed for all DOMETIC pure sine wave inverters that do not include this useful feature as standard, but are designed for retrofitting. The priority circuit automatically switches the inverter to external mains power as soon as it is available. Dometic SinePower inverters ensure uniform voltage switching between on-board and external networks.

The DOMETIC SINEPOWER VS230 priority circuit is a useful optional accessory for upgrading the lower power models in the DOMETIC PP PerfectPower series (150 to 550 W). It automatically switches the inverter to the landline as soon as the motor home or boat connects to an external power source, e.g. at the campsite or port. The power jumbos in the PP PerfectPower series provide this practical function as standard. Also suitable for MSI inverters without proprietary circuit switching, the larger MSI1800T 2300T and 3500T have integrated proprietary circuit switching.

DOMETIC SINEPOWER VS230 TECHNICAL FEATURES

Width: 190 mm

Height: 80 mm

Depth: 80 mm

Weight: 0.98kg

Input voltage (alternating current): 230 V

Output voltage: 230 V

Input Frequency: 50/60 Hz

IP Class: IP20

Min. operating temperature: 0.00 °C

Max working temperature: 40.00 °C

Product features:

Frequency (Hz): 50 / 60

Output voltage (V): 230

Length (mm): 80

Width (mm): 80

Height (mm): 190

Input voltage (V): 230

Weight (Kg): 0.98
