Product description:

GENMAC COMBIPRO RG7300HEC-M5 SINGLE-PHASE GENERATOR 7,1KVA

The generator Genmac Combipro RG7300HEC-M5 single phase is equipped with a Honda gasoline powered engine capable of delivering a power of 7,1KVA with capacitor voltage regulator (AVR optional).

The Generators of the **Genmac Combipro RG7300 series** are among the most **silent** in their category, thanks to the side closing panels and the oversized muffler.

These power generators are built with a **compact and robust** structure with sturdy **wheels and handle** integrated into the frame, which makes them handy and easily transportable. The 300mm diameter wheels with double reinforcement, with which Combipro generators are equipped, are integrated in the structure and the retractable handle can be folded to avoid unnecessary hindrance when not in use. On the frontal part there is also a full length support to avoid sinking into the ground.

The front panel of the Genmac 7,1KVA generator is protected by a canopy and comes complete with a back panel that provides **water protection and insulation**.

The Genmac RG7300 7,1KVA generators are equipped with a **25-liter tank** with a large cap that is convenient to unscrew even with work gloves, filter and **fuel level indicator**. There is also a manual fuel circuit shut-off tap to prevent fuel leakage.

The Genmac Combipro mounts a **Honda OHV 4-stroke petrol engine**. They are very reliable engines that guarantee efficient combustion and **low fuel consumption**. The engines with 7,1KVA generators are also equipped with a protection system that causes the **engine to stop if the oil level is too low**.

The Genmac 7,1KVA Generator is equipped with **electronically controlled injection engines** of

the GX series.

AVR Voltage Regulator

All models in the Genmac Combipro series are available with optional AVR voltage regulator. The AVR is a device that allows to **maintain the output more constant and less load-dependent**. Thanks to this card you have fewer drops or current peaks and this makes it safer to use the various devices connected, improving their performance and durability.

The model equipped with AVR card is highly recommended, as it guarantees a significant improvement in the stability of the output voltage; this feature makes the generators particularly suitable with common use machines with reactive load such as refrigerators, freezers, air conditioners and garden machines. Thanks to the AVR you can enjoy greater stability and thus increase the life of your devices.

TECHNICAL FEATURES OF GENERATOR GENMAC COMBIPRO RG7300HEC-M5

Voltage regulator : capacitor (AVR Optional)

Power supply: Gasoline

Firing: Electric

Phase type: Single phase

Continuous power: 6.4KVA / 5.8KW

Maximum power: 7.1KVA / 6.4KW

Motor: Honda GX 390

Socket panel: 1 x schuko 230V - 1 x 16A 230V - 1 x 32A 230 V

Emission standard: Stage V

Voltage: 230V

Frequency: 50 Hz

3000 revolutions per minute

Tank: 25 Lt.

Autonomy @ 75%: 12 h fixed revolutions

Boosting: Manual

Length (mm): 800

Width (mm): 640

Height (mm): 700

Dry weight (Kg): 116

Images and technical data not binding.

Product features:

Phase: Single phase

Maximum power single phase (KW): 6.4

Continuous power single phase (KW): 5.8

Maximum power single phase (KVA): 6.4

Continuous power single phase (KVA): 7.1

Fuel: Gasoline

Frequency (Hz): 50

Voltage (V): 230

Sockets configuration: 1 x 230V 16A 2P+T CEE - 1 x 230V 32A 2P+T CEE - 1 x 230V 16A SCHUKO

Engine: Honda GX390

Emissions Regulations: Stage 5

Engine rpm (rpm): 3000

Starting system: Electric

Cooling: Air

Poles: 2

Fuel tank capacity (L): 25

Running time (h): 12

Acoustic pressure: 69 dB(A) at 7 m

Length (mm): 800

Width (mm): 640

Height (mm): 700

Dry weight (Kg): 116

Silenced: Yes

Super silenced: No

ATS Switch device : No

Voltage regulator: AVR (optional)

Engine manufacturer: Honda
