

FIRST COLLECTION TANKS HORIZONTAL CYLINDRICAL TANKS FOR OUTDOOR USE

Product description:

HORIZONTAL CYLINDRICAL FIRST COLLECTION TANKS FOR OUTDOOR USE

The polyethylene tanks are intended for the storage of water at atmospheric pressure and meet the standard of the D.M. n. 174 of 06/04/04 according to which the polyethylene tank is suitable for tanks containing drinking water. The tanks are made of linear non-toxic and recyclable high density polyethylene, resistant to shocks and chemicals, temperature changes (-40°C+60°C), UV rays, resistant to algae and with monolithic structure without critical points.

Composition: Polyethylene

Diameter: 1820 mm

Height: 1920 mm

Width: 2200 mm

Hatchway: 520 mm

Product features:

Fuel tank capacity (L): 5000

Length (mm): 1730

Width (mm): 2200

Height (mm): 1920
