Product description:

ELE11 TANK FOR FLAMMABLE LIQUIDS AND FUEL CAPACITY 1100 LITRES

ELE11 is a large tank for flammable liquids and fuel, with horizontal axis, 1100 Litres capacity, suitable for storage, powering generators, burners and heating.

ELE11 is a cylindrical tank with horizontal or vertical axis in S235JR carbon steel sheet (UNI-EN 10025) with a thickness of 20/10 0 30/10 mm, externally treated against corrosion by pickling the sheets, zinc chrome anti-rust primer and finishing with bi-component enamel.

The painting of ELE11 is carried out in the spray booth with scrupulous reduction of polluting agents in respect of the environment.

ELE11 is complete with containment basin with a volumetric capacity equal to 110% of that of the tank.

TECHNICAL CHARACTERISTICS OF ELE11

Product type. Tank for fuels and flammable materials

Axis: Horizontal

Capacity: 1100 Litres

Diameter: 1100 mm

Length: 1226 mm

Width: 1230 mm

Height: 715 mm

With 110% retention basin

Product features:

Fluid type: Diesel

Diameter (Ø): 1100 mm

Tank capacity (L): 1100

Length (mm): 1400

Width (mm): 1300

Height (mm): 1100

Oil fuel transfer pump: Optional
