### MASE EA 50 BS SINGLE-PHASE GENERATOR 5KW

MASE EA 50 BS is a single-phase generator equipped with a Briggs & Stratton XR1450 gasoline engine, capable of delivering a maximum power of 5KW.

The MASE EA 50 BS single-phase generator provides reliable power for home, business and recreational environments, safely powering home appliances and other electronic devices.

The generator is as easy to install and operate as it is to start and stop thanks to clear, intuitive controls. MASE EA 50 BS mounts a Briggs & Stratton XR1450 gasoline engine. These are very reliable engines that provide efficient combustion and **low fuel consumption**. The engines with which the generators are equipped also feature a protection system that causes the engine to stop if the oil level is too low.

MASE EA 50 BS complies with the Stage V emission regulations, this regulation affects the design of NRMM (Non-Road Mobile Machinery), a category which includes, in particular, generating sets intended to be transported. The MASE EA 50 BS are equipped with a **5.3 liter tank** with a large cap that is easy to unscrew even with work gloves

MASE EA 50 BS has an all-steel structure and a large metal tank. The generator ensures efficient and quiet operation thanks to the Briggs & Stratton XR1450 engine that allows to deliver a maximum power of 5KW.

**On express request of the customer** it is possible the additional supply of the transport trolley for the MASE EA 50 BS , the increased tank of 25 l and the AVR voltage regulator.
