

# PMD371 MAGNETIC DRIVE PUMP

**Product price:**

**570,55 € tax excluded**

## Product description:

### PMD371 ELECTRICPUMP WITH MAGNETIC DRIVE

PMD371 is a magnetic drive electricpump for liquids, capable of delivering a maximum power of 43W for a flow rate of 28 l/min.

PMD371 magnetic drive pumps feature a fully hermetic hydraulic part design with no mechanical seal.

This system prevents liquid leaks and emissions into the environment which in case of transfer of acids, corrosive or flammable liquids can be very dangerous for both people and the environment.

Magnetic drive electricpump therefore comply with even the strictest safety and environmental standards.

In addition, thanks to their design, magnetic pumps prevent liquid leakage due to mechanical seal failures which, in the case of very expensive liquids, would lead to unnecessary waste and unbudgeted additional expenses.

A magnetic electricpump is strongly recommended for pumping fluids of high economic value. In fact, being completely leak-free, it avoids huge economic losses related to the liquid that would eventually be lost

### TECHNICAL FEATURES ELECTRICPUMP PMD371

Voltage: 230 V

Frequency: 50 / 60 Hz

Input Power: 32 / 43 W

Intake Fittings: 17 mm

Drain Fittings: 17 mm

Total Head: 3.1 / 4. 4 m

Flow: 25 - 28 l/min  
Pump materials: Glass-filled polypropylene  
Max liquid temperature: 60 °C  
Width: 104 mm  
Length: 179 mm  
Height: 108 mm  
Weight: 1.7 Kg

Are you looking for an electricpump with different characteristics? Here you can find the area dedicated to electricpumps.

Images and technical data are not binding and may be subject to revision by the supplier

**Product features:**

Frequency (Hz): 50  
Voltage (V): 400  
Maximum output capacity (Lt/min): 28  
Diameter (Ø): 17 mm  
Power (W): 32 - 43  
Main body material: Polipropilene riempito di vetro  
Length (mm): 104  
Width (mm): 179  
Height (mm): 108  
Dry weight (Kg): 1.7
