

VTE PAGURO 4EY EPA

Product price:

6.132,00 € tax excluded

Product description:

PAGURO 4EY VTE super-silenced marine genset 3.2 KVA

PAGURO 4EY VTE single-phase marine generator set 3.2 KVA, with Yanmar diesel engine at 3600 rpm and water-cooled with stainless steel water/air heat exchanger.

All parts in contact with seawater are constructed in 316 L stainless steel.

Thanks to the water cooling and the double anti-vibration system, vibrations are reduced to a minimum, making the VTE PAGURO 4EY marine generator set supersilenced and among the lowest noise emission marine generators in its category.

The compact and space-saving VTE PAGURO 4EY generator set is suitable for use on small boats, the VTE PAGURO 4EY is ready to give you all the power you need in complete peace of mind.

Engine

The Yanmar diesel-powered engine makes the PAGURO 4EY genset efficient and reliable. The PAGURO 4EY marine genset is designed with a stainless steel water/air heat exchanger.

Alternator

The PAGURO 4EY marine genset's alternator is synchronous, brushless and with class H insulation. The capacitor regulation makes it ideal for powering sensitive electronic devices that are sensitive to voltage and current fluctuations.

It is also water-cooled via an AISI 316 L stainless steel heat exchanger.

Included with the alternator is the battery charger for the dedicated 12 V / 8 A starter battery.

Soundproofing capsule and double anti-vibration system

The reinforced fibreglass capsule with composite layering and high-density soundproofing material covering make this generator set one of the most silent compared to its competitors.

The capsule allows installation even in narrow spaces, thanks to its composition: two upper and one lower part.

Finally, the double anti-vibration system, internal with 4 soft supports and external with 4 semi-elastic supports, makes the PAGURO 4EY marine genset stable even in less calm waters and silenced, so you can enjoy your navigation without any further worries.

For the PAGURO 4EY marine genset, the installation kit with separator and the installation kit with final silencer are very useful for installation.

If you are looking for another marine genset or another marine product in addition to the PAGURO 4EY, you can consult the entire catalogue of marine gensets.

Product features:

Phase: Single phase

Continuous power single phase (KW): 3.2

Continuous power single phase (KVA): 3.2

Fuel: Diesel

Frequency (Hz): 60

Voltage (V): 115

Engine: Yanmar L70

Engine rpm (rpm): 3600

Starting system: Electric

Number cylinders: 1

Cooling: Water-cooled through steel heat exchanger

Alternator: Synchronous, brushless, capacitor regulation

Consumption (L/h): 0.35

Acoustic pressure: 53 dB(A) at 7 m

Length (mm): 630

Width (mm): 460

Height (mm): 560

Dry weight (Kg): 95

Silenced: Yes

Super silenced: Yes

Engine manufacturer: Yanmar

Approvals: EPA
