The generator guarantees an efficient and silent operation thanks to the KOHLER KD350 StageV engine that allows to deliver a maximum power of 3,5KVA.

STAGEV EMISSION STANDARD

The acronym STAGEV defines the guidelines and limits of gas emissions from engines. The regulation is respected through the installation of special anti-particulate filters in the gensets, but

an indispensable condition for the filter to work correctly is that the genset works at its design temperature.
