

MARINE GENESET SILENCED 1500 RPM 22KVA 400V

Product price:

16.498,00 € tax excluded

Product description:

The generator sets for the nautical sector are a reference point on the market for the optimal relationship between performance, silence and reduced dimensions.

Our range is very wide to satisfy every need of power and performance, for sailing and motor boats.

Silent

 $\langle n \rangle$

Both the engine and the generator alternator are water cooled: as no ventilation is required for cooling, noise is drastically reduced.

In addition, the outer shell has a single small opening for the entry of combustion air with a labyrinth path that prevents the exit of noise, the outer shell is made of reinforced fiberglass multilayer and covered with high-density neoprene for maximum sound insulation.

Lightweight and compact

Each product in the Paguro range is conceived, designed and built with ad hoc components to reduce the overall dimensions and exploit the empty spaces inside. Thanks to VTE technology, each Paguro generator is the most compact with the same energy performance.

Safe

This generator is equipped with alarm indicators and a charging indicator with LED light for an immediate evaluation of the power delivered. They stop automatically in the event of low oil pressure or overtemperature.

Non-binding images and technical data.
