PRAMAC P4000 GENERATOR 3,5 KVA SINGLE-PHASE STAGEV

PRAMAC P4000 single-phase generator with Yanmar L70V STAGEV Diesel engine, capable of delivering a power of 3,5 KVA, **complete with voltage regulator** Condenser **(AVR Optional)** .

The Generator adapts perfectly to the most varied uses, thanks to the handling trolley that allows it to be relocated in perfect safety and simplicity. Thanks to the increased tank of 18 l, this generator has an extraordinary autonomy of 15 h with 75% of the load.

These generators are equipped with high quality components, light weight, compact, ease of use and also the modern design, equipped with a practical electric start.

The PRAMAC P4000 generator is equipped with electric or automatic starting via the ATS panel, which allows it to be switched on automatically in the event of a blackout.

STAGEV EMISSIONS REGULATION

The generating set is equipped with a "mobile" STAGEV motorization, as required by the European Regulation 2016/1628. These new engines make it possible to exponentially reduce the emissions of particulate matter and nitrogen oxides delivered by the generator into the environment, and ensure a reduction of the environmental impact of 200% compared to standard engines.

ATS AUTOMATIC STARTING PANEL (OPTIONAL)

The generator is set up for the use of an ATS automatic starting panel. Thanks to which you will no longer have to worry about blackouts because if it goes off the electricity grid this panel is able to automatically start the generator and will allow you to continue your business without losing your work data.
