## Product description:

### GENERATOR SINGLE PHASE STAGE V AVR 3,3 KW

Generator equipped with a gasoline-powered GENKINS 225 230M **StageV** engine, delivers a maximum power of 3.3KW, complete with AVR voltage regulator.

Equipped with **tear-off with self-wrapping**, equipped with AVR voltage regulator that allows connection with sensitive electronic devices (computers, smartphones, TVs) without the risk of damaging them due to surges in the current power supply.

The generator provides reliable power for home, business and leisure environments, safely powers home appliances and other electronic devices. Extremely practical sockets and controls make starting and operating the generator easier, making these operations extremely simple and fast.

The generator has a practical double curved handle and integrated towing trolley, to facilitate mobility and storage. structure completely in steel and a tank with a maximum capacity of 15 liters that allows the generator to run for about 6.5 hours at full load.

## STAGEV EMISSIONS REGULATION

Equipped with "mobile" STAGEV motorization, as required by the European Regulation 2016/1628. These new engines make it possible to exponentially reduce the emissions of particulate matter and nitrogen oxides delivered by the generator into the environment, and ensure a reduction in the environmental impact of 200% compared to standard engines.
