Product description:

GENERATOR 8 KVA SINGLE-PHASE STAGEV INVERTER

The generator single-phase is equipped with a STAGEV petrol motor, capable of delivering a **maximum power of 8KVA**, complete with **Inverter voltage regulator**.

The is a versatile generator, which can be used to power a wide variety of equipment, including camping, emergency power and commercial equipment. Furthermore, the generator with an overload protection, which prevents damage to the connected.

The StageV generator has a 25-litre fuel tank, which guarantees an autonomy of approximately 9 hours at full load and 12 hours at reduced load. Additionally, the generator features an electric start function, which simplifies starting and reduces operator fatigue.

The compact and portable design makes it easy to carry and use anywhere. In addition, this generator is equipped with wheels and handles, making it easier to transport and move.

The is a high quality inverter generator, produced by one of the major brands in the sector. Thanks to its inverter technology, its power and its autonomy, this 8KVA generator is an excellent choice for those looking for reliable and clean energy in an easy and convenient way, wherever they need it.

The generator set guarantees efficient and silent operation thanks to the StageV engine, which allows it to deliver a maximum output of 8KVA.

The advantages of Inverter technology

The Generator has been specially developed for camping, caravans, homes, and hobby applications, but also for work as it is very robust and easy to handle, being able to use all its with inverting technology.

The inverter voltage regulator works as an automatic control device, which constantly monitors the inverter output and adjusts it to ensure that it is always stable and safe. This component is essential for the protection of sensitive devices, such as computers, which require a constant and reliable supply voltage to function properly.

STAGEV EMISSION REGULATIONS

The generator set is equipped with a "mobile" STAGEV engine, as required by European Regulation 2016/1628. These new engines make it possible to exponentially reduce the particulate and nitrogen oxide emissions released by the generator into the environment, and guarantee a 200% reduction in environmental impact compared to standard engines.

TECHNICAL FEATURES:

Phase Type: Single Phase
Max Power: 8KVA / 7.2 KW
Fuel: Gasoline
Voltage: 230V
Frequency: 50Hz
Motor: 460 BE
Engine rpm: Variable
Emissions standard: StageV
Starter: Electric
Voltage regulator: Inverter
Tank capacity: 25 Lt
Consumption: 2.9 Lt/h at 75% load
Autonomy: 8.5 h at 75% load
Length: 730 mm
Width: 580 mm
Height: 710 mm
Weight : 87 Kg

Are you looking for a product with different technical characteristics? [HERE](#) you can find the area dedicated to specialized brands.

Non-binding images and technical data.

Product features:

Phase: Single phase
Maximum power single phase (KW): 7,2
Maximum power single phase (KVA): 3.6
Fuel: Gasoline

Frequency (Hz): 50

Voltage (V): 12

Sockets configuration: No.2 schuko 230V socket, No.1 CEE 32A-3P 230V socket, 12VDC socket, cigarette lighter socket

Engine: 460 BE

Emissions Regulations: Stage 5

Engine rpm (rpm): Variable

Starting system: Electric

Number cylinders: 1

Fuel tank capacity (L): 25

Consumption (L/h): 2.9 at 75% load

Running time (h): 8.5 at 75% of the load

Acoustic pressure: 62 dB(A) at 7 m

Length (mm): 730

Width (mm): 580

Height (mm): 710

Dry weight (Kg): 87

Silenced: Yes

Super silenced: Yes

Product type: Generator

Voltage regulator: Inverter
