

RemigoOne Electric Outboard 3 HP with Shaft Adjustable

Product price:

2.200,00 € tax excluded

Product description:

RemigoOne Electric Outboard 3 HP with Shaft Adjustable

RemigoOne is a 3 HP electric outboard motor designed for use on boats such as sailboats, fishing boats or inflatable boats.

This engine is fully battery-powered, which means there is no need for fuel, oil or other environmentally harmful chemicals. The battery built into the aluminum RemigoOne is fully protected from all weather conditions. It contains enough energy to provide a range of more than 22 km at a cruising speed of 5 km/h on a tender-type boat.

To recharge RemigoOne, you can plug it into any power outlet with the included AC charger and recharge it in 6 hours. You can also purchase a quick charger, which recharges it in 3 hours.

The electric outboard has an aluminum three-blade propeller and an ergonomically designed control handle for ease of use. RemigoOne has a maximum speed of 5 km/h and can run up to 2.5 hours on a full battery charge.

This electric outboard motor is lightweight and compact, making it easy to install and transport. In addition, because it does not emit exhaust gases, it is very quiet and does not harm its surroundings. RemigoOne is built to effectively propel any boat weighing up to 1500 kg, dinghies (soft or hard keel), sailboats (J/70, Seascope, Meteor, Este24, ...), fishing boats, etc.

Continuous mast length adjustment allows you to find the exact location position for best engine performance anywhere between 15 and 30 inches high (S to XL) by simply loosening 3 screws.

Technical specifications RemigoOne:

Input power: 1000 W

Motor type: brushless DC

Static thrust: 30 kg
Comparable gasoline outboard: 3 HP
Integrated Battery: 1085 Wh Li-Ion
Rated voltage: 36 V
Nominal battery charging voltage: AC 100 / 240 V, 50 / 60 Hz
Nominal charger input voltage: DC 12 / 24 V
Ultimate charging voltage: 42 V
Shaft length: 15-30 inches / equivalent to S-XL
Maximum propeller speed: 1000 rpm
Control: 2-button control
Steering: lockable
Tilt: manual with ground protection
Manual trim: 4 positions
Reverse yes
Length: 1250 mm
Width: 295 mm
Height: 90 mm
Total weight: 12 kg

Looking for an electric outboard with different technical characteristics? [HERE](#) you can find the entire Remigo range or other brands specializing in the field.

Product features:

Fuel: Electric
Engine: 3 HP
Ignition: Digitale
Starting system: Electric
Rpm at full throttle (rpm): 1000
Appearance and engine lifting: Manual
Transom height (mm): Adjustable
Net power (kW): 2.2
Length (mm): 1250
Width (mm): 295
Height (mm): 90
Dry weight (Kg): 12
Shaft Length: S - XL
