Product description:

ECOFLOW BLADE ROBOTIC LAWN MOWER

Ecoflow Blade is a fully programmable robotic lawn mower equipped with a lithium-ion battery for long working autonomy.

Ecoflow Blade is a modern lawn mower care machine that stands out from the competition for its versatility, innovation and energy efficiency. Equipped with an array of cutting-edge technologies, this home automation mower is capable of delivering exceptional performance on any surface, from the smallest to the largest lawns.

Equipped with an innovative rotating blade system that ensures a precise and even cut across the entire lawn surface. Thanks to its stainless steel blade, it can cut grass of any height, ensuring a flawless result every time. In addition, the rotary blade cut promotes greater maneuverability and ease of movement, allowing complete coverage of even the hardest-to-reach areas.

The Ecoflow is also equipped with a number of sensors, including a GPS, that allow it to move autonomously within the garden or lawn, thus, the mower can work independently. The GPS navigation system also allows it to keep track of the routes followed by the home automation mower and avoid passing over the same area twice.

With its built-in Wi-Fi and Bluetooth connection, the Ecoflow can interface with other smart devices, such as smartphones, tablets, and voice assistants. Thus, you can schedule lawn mowing remotely, check the status of the machine, or receive notifications via app. In addition, thanks to compatibility with voice assistants, you can control the mower by voice, making it even easier and more immediate to use.

But one of the Ecoflow most outstanding features is its energy efficiency. Equipped with a large-capacity lithium-ion battery, it is capable of cutting grass for up to four consecutive hours without

needing to be recharged.

TECHNICAL FEATURES ECOFLOW BLADE

Climbing ability: 27°

Vertical ascent of obstacles: 40 mm

Cutting width: 260 mm

height adjustment: 20 to 76 mm

Battery type: lithium-ion 25.2 Vdc / 7A

Autonomy per charge: 240 min

Battery life: 120 min, more than 400 m²

Charging times: 130 min

Waterproofness: IPX5

GNSS working modes: GPS, Beidou, Galileo, GLONASS

Bluetooth channel: 2400-2483.5MHz

Smartphone application: Android and iOS

Charging station positioning: Flexible

Length: 660mm

Width: 440 mm

Height: 310 mm

Weight 16.2 kg

Product features:

Protection degree: IPX5 Waterproof

Length (mm): 660

Width (mm): 440

Height (mm): 310

Product type: Lawnmower

Weight (Kg): 16.2

Video: 2RJVILuyvy8

Amplitude of work area: Up to 800 m² with one charge

Maximum wire inclination on sloping areas: 27°

Blade type: 3 (Pivoting blades)

Cutting width (mm): 270 mm

Cutting height adjustment: Electric from 20 to 76 mm

Autonomy for each recharge: 240 min

Recharge times: 130 min

Smartphone application: Android e iOS

Positioning the charging station: Parallel to the perimeter wire
