Product description:

PRAMAC GPW60 I/FS5 GENERATOR 60KVA SINGLE-PHASE/THREE-PHASE STAGEV AUTOMATIC PANEL

The PRAMAC GPW60 I/FS5 single-phase/three-phase generator is equipped with an Iveco FPT F34TEVP01 StageV diesel engine and is capable of delivering a maximum power of 60 KVA, complete with an **Automatic Voltage Regulator (AVR)**.

The PRAMAC GPW60 I/FS5 generator comes with electric, manual, or automatic starting options using a 12V battery. It features a **Deep Sea 7320 controller** that displays all electrical parameters of the engine and generator, operational functions, generator status, and allows comprehensive management of the generator. It also displays any potential system errors or alarms.

Thanks to the included AVR, the PRAMAC GPW60 I/FS5 generator can deliver "clean" current and voltage with precision of less than one percent. This ensures safe connection of any electrical and electronic devices.

The PRAMAC GPW60 I/FS5 generator ensures efficient and quiet operation, powered by the Iveco FPT F34TEVP01 StageV engine, capable of delivering a maximum power of 60 KVA.

PREPARATION FOR AUTOMATIC START PANEL (ATS)

The generator is prepared for use with an Automatic Start Panel (ATS), which automatically starts the generator in case of a power outage. This feature ensures uninterrupted operation and data retention during power interruptions.

STAGEV EMISSIONS REGULATION

The generator is equipped with a StageV "mobile" engine, as required by European Regulation 2016/1628. These new engines significantly reduce particulate and nitrogen oxide emissions into the environment, reducing environmental impact by 200% compared to standard engines.
