Product description:

VITRIFRIGO DRW70A REFRIGERATOR/FREEZER 80L SINGLE-DRAWER

The VITRIFRIGO DRW70A is an 80-liter refrigerator/freezer with a single drawer that offers versatility and outstanding performance.

This refrigerator/freezer makes use of the natural refrigerant R290, known for its low Global Warming Potential (GWP), making it an environmentally friendly choice for those who are environmentally conscious.

An advanced feature of the VITRIFRIGO DRW70A is the possibility of power supply through a bivalent control unit, which is available as an option. This allows the operation of the device to be tailored to specific needs, improving energy efficiency.

Interior lighting is provided by a high-brightness LED light system, which provides a clear view of the interior of the refrigerator/freezer, making it easier to find food.

Another advantage of this appliance is its waterproof digital thermostat with touchscreen display and vent position system. This allows precise control of the internal temperature and convenient adjustment.

The VITRIFRIGO DRW70A freezer is 3-star rated, which means it can reach a temperature of -18°C even in ambient conditions with temperatures up to 43°C . This ensures the safe storage of frozen foods.

The VITRIFRIGO DRW70A's new drawer features new-generation internal slides and dividers, which improve organization and access to stored foods.

The Total No Frost system ensures better food preservation by preventing the formation of ice and the accumulation of moisture inside the device. This means there is no need to thaw

periodically, simplifying maintenance and ensuring food freshness.

VITRIFRIGO DRW70A TECHNICAL SPECIFICATIONS

Total capacity: 80 liters

Power supply: 12/24Vdc (12/24 Vdc 100-240Vac optional)

Maximum consumption during defrost: 130W

Maximum consumption during defrost: 10.5A (12 / 24 Vdc)

Maximum consumption: 8A (12Vdc) - 4A (24 Vdc)

Daily refrigerator consumption: 0.25 kWh/24h (12 / 24 Vdc)

Daily freezer consumption: 1.1 kWh/24h (12/24Vdc)

Width: 666 mm

Height: 467 mm

Depth: 590 mm

Net weight: 38 Kg

Product features:

Input power (W): 12-24 Vdc

Length (mm): 666

Width (mm): 467

Height (mm): 590

Dry weight (Kg): 38

Power consumption (W): 1,35 kWh/24h (12/24Vdc)

Product type: Drawer refrigerator

Colour: Stainless steel

Capacity of the refrigerator (L): 80
