Product description:

VITRIFRIGO DRW180A REFRIGERATOR/FREEZER 150L WITH DOUBLE DRAWER

The VITRIFRIGO DRW180A is an innovative 150-liter refrigerator/freezer with two separate drawers designed for the marine market.

This model offers an innovative "All In One" feature in that the two drawers can handle different temperatures separately, providing a versatile solution for all needs.

A notable ecological feature is the use of the natural refrigerant R290, known for its low Global Warming Potential (GWP), making the VITRIFRIGO DRW180A an environmentally sustainable choice. Its design was recognized with a prestigious "Special Mention" award at the DAME Award during METS 2018, highlighting its stylistic and technological innovations.

The VITRIFRIGO DRW180A offers multiple "All In One" usage modes: refrigerator+freezer, freezer+freezer or refrigerator+refrigerator, providing unparalleled flexibility.

Temperature management is made precise by a waterproof digital thermostat with touchscreen display and vent position system. The bottom drawer, with a 3-star rating, can reach a temperature of -18°C even in environments with temperatures up to 43°C , ensuring safe storage of frozen food.

Versatile positioning is supported by the "Double Door Position" function, which allows the door to be opened both inside and outside, with the same attachment profile.

The new design of the of the VITRIFRIGO DRW180A drawers features new-generation internal slides and dividers, improving organization and access to stored foods. The Total No Frost system ensures better food preservation by preventing ice formation and moisture accumulation.

Interior lighting is provided by a high-brightness LED light system, ensuring a clear and detailed view of the inside of the refrigerator/freezer.

TECHNICAL SPECIFICATIONS VITRIFRIGO DRW180A

Total capacity: 150 l

Power supply 12/24Vdc (12 / 24 Vdc 100-240Vac optional)

Max consumption during defrost: 130W (12/24V)

Max consumption during defrost: 10.5 (12/24V)

Max consumption: 8A (12V) - 4A (24Vdc)

MAX daily consumption: 1.2 kWh/24h (12/24Vdc)

Width: 666 mm

Height: 874 mm

Depth: 590 mm

Net weight: 55 Kg

Product features:

Input power (W): 12-24 Vdc

Length (mm): 666

Width (mm): 590

Height (mm): 874

Dry weight (Kg): 55

Power consumption (W): 130

Product type: Drawer refrigerator

Colour: Stainless steel

Capacity of the refrigerator (L): 150
