Product description:

NDS SMART-IN 1500W IVT Pure Wave: your ideal travelling companion

NDS SMART-IN 1500W IVT Pure Wave is the intelligent inverter that allows you to enjoy life in your motorhome, caravan or other recreational vehicle without giving up anything.

The IVT function: your battery safe

The IVT (Intelligent Voltage Transfer) function enables the inverter to automatically power itself from the 230V mains when available, and switch back to battery when needed. This function allows you to travel with total freedom, without worrying about running out of power.

NDS 1500W SMART-IN continuous for all your devices

NDS 1500W SMART-IN IVT Pure Wave has a continuous power of 1500W, allowing you to power all your electronic devices, such as televisions, computers, refrigerators, etc. The peak power is 4000W, which also allows you to use energy-intensive devices, such as induction cookers or coffee machines.

NDS SMART-IN Pure Wave for optimal quality

NDS SMART-IN IVT Pure Wave generates a pure wave, which is the closest waveform to that of the household power grid. This ensures optimal quality for all your electronic devices, preventing damage or malfunctioning.

Compact size and low weight

The NDS SMART-IN Pure Wave has compact dimensions (365x270x108h mm), making it easy to install and move according to your needs.

Technical characteristics NDS SMART-IN 1500W IVT:

Input voltage: 12V

Continuous power: 1500W

Peak power: 4000W

Output voltage: 230Vac

USB output: 5V 2.1A

Dimensions (mm): 365x270x108h

Cables included: 25mm² length 80cm

NDS SMART-IN 1500W IVT Pure Wave is the inverter that allows you to enjoy life in your motorhome, caravan or other recreational vehicle without giving up anything. The IVT function, 1500W continuous power, pure wave and compact dimensions make it the ideal solution for your needs.

With the NDS SMART-IN 1500W IVT Pure Wave, you can fully enjoy your holiday in your motorhome, caravan or other recreational vehicle without worrying about running out of power.

NDS SMART-IN 1500W IVT Pure Wave is the inverter that allows you to live your life on the road without giving up anything, from your electronic devices to your household appliances.

Product features:

Frequency (Hz): 50

Output voltage (V): 230

Length (mm): 323

Width (mm): 270

Height (mm): 107.5

Input voltage (V): 12 Vdc / 230 Vac

Kind of wave: Pure Sinusoidal

Continuous power (W): 1500
