Product description:

VITRIFRIGO VFT30 PORTABLE FRIDGE-FREEZER

The VITRIFRIGO VFT30 from the Vfree Plus series is a portable fridge-freezer ideal for yachts, boats, and special installations. With a total capacity of 30 liters, it provides ample space for storing food and drinks during marine travels. Its compact and lightweight design makes it perfect for limited space onboard.

This product is powered by both 12/24Vdc direct current and 100-240Vac 50/60Hz alternating current, ensuring flexibility in power sources. With a nominal consumption of 60W, it ensures excellent energy efficiency, allowing savings on consumed energy.

The overall dimensions of the VITRIFRIGO VFT30 are 631 mm width, 375 mm height, and 378 mm depth. Despite its compact size, it offers high storage capacity, ideal for meeting onboard storage needs.

The F energy class and the internal temperature range from +20°C to -20°C ensure optimal food preservation, keeping them fresh and safe for a long time. The LCD digital control panel, part of the Total Control system, allows easy access to all refrigerator functions.

With the included remote control, you can manage the fridge functions directly from your smartphone, offering total control even at a distance. The presence of the internal LED light not only improves visibility inside the fridge but also helps reduce energy consumption.

The Double power system is included as standard, providing a cable for power through the 12/24Vdc cigarette lighter socket and an external power supply at 100-240Vac, ensuring maximum flexibility in use. Optionally, the VITRIFRIGO VFT30 offers the Super energy kit, which includes a removable lithium-ion battery of 15600 mAh, providing an option for autonomous power in situations where the main power source is unavailable.

For additional protection during outdoor use, the Max protection option is available, which protects the fridge from weather elements and accidental damages. Additionally, the Solar kit is available, allowing you to power the fridge using solar energy, offering a sustainable and eco-friendly solution.

Moreover, you can choose the Next gen slides option, which provides ultra-resistant steel sliding guides for your fridge, ensuring longer durability. With the VITRIFRIGO VFT30, you get a versatile and reliable unit, perfect for meeting storage needs during sea adventures.

Technical Specifications VITRIFRIGO VFT30:

Total capacity litres: 30

Net weight: 12.8 Kg

Power supply: 12/24Vdc - 100-240Vac 50/60Hz

Nominal consumption: 60W

Width: 631 mm.

Height: 375 mm.

Depth: 378 mm.

Energy class: F

Internal temperature range: +20°C / -20°C

Product features:

Length (mm): 378

Width (mm): 631

Height (mm): 375

Dry weight (Kg): 12.8

Feed Type: 12/24Vdc - 100-240Vac 50/60Hz

Product type: Portable and special installation fridge-freezers

Capacity of the refrigerator (L): 30

Energy class: F

Nominal consumption: 60W

Internal temperature: +20°C / -20°C
