Product description:

VITRIFRIGO C180 OCX2 SINGLE REFRIGERATOR

The VITRIFRIGO C180 OCX2 represents a significant evolution in the range of stainless steel drawer refrigerators and freezers. These appliances combine innovative design and advanced functionality to offer a superior food preservation experience.

The design of the VITRIFRIGO C180 OCX2 series has been completely revamped, with a new squared stainless steel door that gives it a modern and elegant appearance. Additionally, a new top with glossy finishes has been introduced, adding a touch of sophistication to the product. One of the distinctive features of this series is its installation flexibility. Thanks to a single fixing profile, the refrigerator can be positioned with the door either inside or outside, simply by sliding the profile itself. This profile also features a concealed vent that optimizes ventilation to ensure optimal performance.

The new upper top of the VITRIFRIGO C180 OCX2 series features an element that allows for "Vent Position", allowing the door to be left slightly open during periods of non-use to prevent the formation of mold and unpleasant odors. The total storage capacity of the VITRIFRIGO C180 OCX2 is 157 liters, with a net weight of 41 kg. The power supply system is flexible, operating at 12/24Vdc and also available with a dual-mode control unit 12/24Vdc - 100-240Vac 50/60Hz.

The nominal power consumption of the VITRIFRIGO C180 OCX2 is 45W.

Among the innovative features of the VITRIFRIGO C180 OCX2, the "Double Door Position" should be mentioned, which allows the same fixing profile to be used for two different door configurations: inside or outside. The "Steelock" closing system ensures safety and reliability, while the LED thermostat of the VITRIFRIGO C180 OCX2 allows precise control

of the internal temperature. The Steelock handle of the VITRIFRIGO C180 OCX2 is equipped with "Vent Position" to allow proper ventilation even when the refrigerator is not in use. The "Venting Frame" vent system improves air circulation and the efficiency of the refrigeration system of the VITRIFRIGO C180 OCX2.

The drawers of the VITRIFRIGO C180 OCX2 are made of resistant materials and offer ample space to organize food in a practical and orderly manner. All models of the OCX2 series are made of 316 stainless steel, ensuring durability and resistance over time. The internal LED light ensures optimal illumination inside the refrigerator.

In conclusion, the VITRIFRIGO C180 OCX2 series represents an excellent option for those seeking a high-quality refrigerator or freezer that combines refined design, advanced functionality, and installation flexibility.

Technical Characteristics VITRIFRIGO C180 OCX2:

Total capacity litres: 157

Net weight: 41 Kg.

Power supply: 12/24Vdc (also available with bivalent 12/24Vdc - 100-240Vac 50/60Hz)

Nominal consumption: 45W

Width: 674 mm.

Height: 879 mm.

Depth: 568 mm.
