

EMACH EMW50Z Self-priming Clearwater Motor Pump

Product price:

202,90 € tax excluded

Product description:

EMW 50Z: Self-priming motor pump for clear water Stage V

The EMW 50Z is a self-priming motor pump designed for transferring and draining clear and slightly dirty water.

It is equipped with a Stage V 4-stroke petrol engine that offers efficient performance and low environmental impact.

Key features:

Stage V engine: complies with the latest European emission regulations to reduce air pollution.

Displacement: 212 cc for enough power for a variety of applications.

Recoil start: simple and reliable.

Suction and delivery ports: Ø 50 / 2" for high flow rate.

Maximum suction: 8 metres for high suction capacity.

Fuel: petrol for easy refuelling.

Maximum suction: 28 metres for high flow capacity.

Delivery capacity: 600 L/min for fast flow.

Fuel consumption: 395 g/kWh for high energy efficiency.

Dimensions: 477x395x410 mm for a compact and transportable design.

Weight: 23.5 kg for easy handling.

Specifications EMW 50Z Stage V:

Engine:

Stage V - 4-stroke

Model: R210

Displacement: 212 cc

Starting system: recoil

Pump:

Suction and delivery ports: Ø 50 / 2"
Maximum suction: 8 m
Maximum pressure: 28 m
Delivery capacity: 600 L/min
Performance:
Fuel consumption: ?395 g/kWh
General:
Dimensions: 477x395x410 mm
Weight: 23.5 Kg
Fuel: Petrol
Emissions regulations: Stage V

Looking for a product with different technical characteristics? [HERE](#) you can find the area dedicated to EMA generators

Product features:

Fuel: Gasoline
Engine: R210 Stage V – 4 times
Emissions Regulations: Stage 5
Ignition: Recoil
Starting system: Pull starter
Engine capacity (cm³): 212
Pump type: Self-priming
Pressure (bars): 28
Product dimensions (mm): 477x395x410
Weight (Kg): 23.5
