

# EMACH EMW80Z Self-priming Clearwater Motor Pump

Product price:

**225,00 € tax excluded**

## Product description:

EMW 50Z: Self-priming motor pump for clear water Stage V

The EMW 50Z is a self-priming motor pump designed for transferring and draining clear and slightly dirty water.

It is equipped with a Stage V 4-stroke petrol engine that offers efficient performance and low environmental impact.

## Key features:

Stage V engine: complies with the latest European emission regulations to reduce air pollution.

Displacement: 212 cc for enough power for a variety of applications.

Recoil start: simple and reliable.

Suction and delivery ports: Ø 50 / 2" for high flow rate.

Maximum suction: 8 metres for high suction capacity.

Fuel: petrol for easy refuelling.

Maximum suction: 28 metres for high flow capacity.

Delivery capacity: 600 L/min for fast flow.

Fuel consumption: ?395 g/kWh for high energy efficiency.

Dimensions: 477x395x410 mm for a compact and transportable design.

Weight: 23.5 kg for easy handling.

## Specifications EMW 50Z Stage V:

Engine:

Stage V - 4-stroke

Model: R210

Displacement: 212 cc

Starting system: recoil

Pump:

---

Suction and delivery ports: Ø 50 / 2"  
Maximum suction: 8 m  
Maximum pressure: 28 m  
Delivery capacity: 600 L/min  
Performance:  
Fuel consumption: ?395 g/kWh  
General:  
Dimensions: 477x395x410 mm  
Weight: 23.5 Kg  
Fuel: Petrol  
Emissions regulations: Stage V

**Product features:**

Fuel: Gasoline  
Engine: R210 Stage V – 4 times  
Emissions Regulations: Stage 5  
Ignition: Recoil  
Starting system: Pull starter  
Engine capacity (cm<sup>3</sup>): 212  
Pump type: Self-priming  
Pressure (bars): 28  
Product dimensions (mm): 500x395x445  
Weight (Kg): 27
