FISCHER PANDA 12Mini PMS

FISCHER PANDA 12Mini PMS Power and Versatility for your Boat

FISCHER a single phase marine generator that offers high performance and a wide range of applications.

Powered by a 719 cm³ 3-cylinder Kubota KU D722 engine, the FISCHER PANDA 12Mini PMS delivers a nominal power of 11.5 kW

(11.5 kVA) and a continuous power of 10.3 kW (10.3 kVA), providing enough energy to power a variety of devices on board your boat.

The engine speed of 3600 rpm ensures efficient and smooth operation, while the 120 V nominal voltage and 60 Hz frequency make it compatible with most marine electrical appliances.

The compact and robust design, with dimensions of 705 x 450 x 587 mm and a weight of 195 kg, makes the FISCHER PANDA 12Mini PMS easy to install and transport, even on small and medium-sized boats.

Special attention has been paid to sound insulation:

the GFK 3D version with GFK sound cover and 3D sound-absorbing material significantly reduces noise,

ensuring quiet and comfortable operation, with sound levels of 53 dB(A) at 7 metres, 63 dB(A) at 5 metres and 68 dB(A) at 1 metre.

The FISCHER also boasts several features that increase its practicality and safety:

12 V starting system: for quick and safe starting.

Fuel level indicator: for precise monitoring of remaining fuel.

Ground socket: for greater safety during electrical operations.

Transport handle: for easy transportation from one point to another on the boat.
