Product description:

FENZI G12 GO ADBLUE TRANSPORT CONTAINER 230LT

The FENZI G12 GO Polyethylene Transport Container for AdBlue 230LT is the ideal solution for the safe and efficient transport of AdBlue. The FENZI Container has been carefully designed to offer the best ratio of external dimensions to useful capacity, standing out as one of the most compact on the market.

The FENZI G12 GO Container model is made of linear polyethylene through rotational molding, ensuring lightness, robustness, and safety.

Main Features of FENZI G12 GO:

The FENZI G12 GO Transport Container is exempt from ADR regulations, allowing it to be transported on all the most common means of transport without restrictions. This portable tank includes a series of features that make it unique:

Reinforced key-locking lid: ensures optimal security during transport.

Vent cap: for easy and safe filling.

Double-effect safety valve: to prevent spills and provide additional safety.

AdBlue transfer group: facilitates the transfer of the liquid.

Full-load lifting openings with forks: allow for safe and stable lifting.

Empty lifting handles: for easy handling when the container is empty.

Strap positioning housings: ensure the container remains well secured during transport.

Stainless steel level indicator: provides an accurate reading of the content.

Aluminum or AdBlue-compatible material inserts: for long-lasting durability and corrosion

resistance.

Technical Specifications of FENZI G12 GO:

The FENZI G12 GO offers a capacity of 230 liters, with dimensions of 800Lx600Px700H mm and a thickness of 9 mm. The empty weight with the pump group is 27 kg. It is equipped with a 12 or 24-volt pump that delivers a flow rate of 40 liters per minute, a 4-meter flexible hose with an automatic nozzle terminal, and 2-meter battery connection clamps. The key-locking lid is included, as well as the housings for the positioning of anchoring straps and the openings for full-load lifting with forks.

Optional Accessories for FENZI G12 GO:

For further customization, an in-line digital flow meter is available, providing precise measurement of the dispensed liquid.

The FENZI G12 GO Polyethylene Transport Container for AdBlue is the perfect choice for those seeking a portable tank that combines compactness, safety, and functionality. Its robust and lightweight construction, along with a range of safety features, makes it ideal for the transport of AdBlue with maximum efficiency and peace of mind.

By choosing the FENZI G12 GO Container, you are opting for a high-quality product designed to meet the most demanding market needs. Reliable, safe, and easy to use, the FENZI G12 GO Container is a secure investment for the transport of AdBlue. It not only meets all safety standards but also offers a range of features that facilitate the transport and handling of the liquid, always ensuring optimal performance.
