Product description:

FENZI G7 IRON TANK FOR DIESEL FUEL 440LT

The FENZI G7 Iron Diesel Fuel Tank 440LT is a high-quality and secure product, specifically designed for transporting hazardous and flammable liquids such as diesel. Made from EN 10025 S235JR carbon steel, the FENZI G7 ensures durability, meeting stringent European standards.

The FENZI G7 tank has been approved by the Ministry of Infrastructure and Transport in compliance with ADR regulations, confirming its suitability for transporting hazardous materials. Each unit undergoes rigorous inspections by competent authorities to ensure adherence to high safety standards.

A distinctive feature of the FENZI G7 Iron Tank is its double-effect safety valve, designed to prevent content leakage even in case of vehicle overturns, providing additional protection during transport. Moreover, to facilitate refueling operations, the FENZI G7 can be equipped with a complete pump system.

Its cylindrical shape is housed in a robust parallelepiped-shaped metal structure. The FENZI G7 Iron Tank features an external coating for effective corrosion protection, ensuring long-lasting durability even in severe environments.

Additionally, the FENZI G7 includes a fusible cap and inspection flange to facilitate maintenance and

internal inspection. Designed with baffles to control liquid inertia during transport, despite its specific capacity of 440 liters.

Models:

-G7 F45/12

-G7 F70/12

The only differences between the G7 F45/12 and G7 F70/12 models lie in their dispensing power. The F45 offers lower dispensing power, while the F70 is designed to provide higher power, meeting diverse operational needs while maintaining the high quality and reliability typical of FENZI products.

Additional features include lifting eyes and bottom lifting sockets, facilitating tank handling operations.

Interlocking fittings allow efficient use of space, especially during transport or storage. Each tank is equipped with an identification plate and comes with a user manual, maintenance guide, and certification from the testing body confirming product compliance.

The FENZI G7 Iron Diesel Fuel Tank is the ideal solution for those seeking a safe, robust, and compliant container for diesel fuel transport. With the use of high-quality materials, carefully designed features, and advanced safety systems, the FENZI G7 stands out as a reliable and durable product, perfectly suited to meet fuel transport needs.

Technical Specifications of the FENZI G7 Iron Fuel Tank:

Capacity: 440 liters

Width: 800 mm

Length: 1090 mm

Height: 1150 mm

Weight: 144 kg
