Product description:

FENZI G10 STORAGE TANK WITH GRILLE 325LT

The FENZI G10 Storage Tank with Grille represents the ideal solution for the containment and safe storage of contaminating liquids. Made of carbon steel with adequate thickness, it is available in

both externally painted and zinc-coated versions to ensure durability and resistance over time. The galvanized grating ensures a safe and non-slip surface.

With dimensions designed to optimize the price/practicality ratio, the FENZI Storage Tank with Grille

features a low height (350 mm) to facilitate access to stored contents, while still maintaining a containment capacity of 325 liters.

Usage

The FENZI G10 Storage Tank is extremely versatile and suitable for multiple uses. In addition to being commonly used for storing new oil drums, it is also applied in cleaning operations of components contaminated by pollutant liquids. This versatility makes it essential in industrial environments where safe fluid management is crucial.

Accessories and Specifications of the FENZI G10 Tank:

Various accessories are available upon request to optimize the use of the basin, including drum supports and ramps to facilitate access with manual trolleys. Standard dimensions include a width of 850

mm and
a depth of 1000 mm, optimized to fit into various work environments without compromising usability.

The FENZI G10 is essential for the industrial sector, ideal for storing new oil as well as for the safe cleaning of contaminated components, ensuring a work environment compliant with current regulations.

The FENZI G10 Storage Tank with Grille therefore represents the ideal choice for those seeking a robust, safe product suitable for multiple industrial and commercial applications. Thanks to its high-quality construction and compliance with current regulations, it guarantees reliable and durable performance over time.
