

Osmosea Multi Cartridge PVC Filters

Product description:

Osmosea Stainless Steel Multi Cartridge Filters

PVC Multi Cartridge Filter: Purity and durability at your fingertips

Our Multi Cartridge Filter, made entirely of PVC-U, is designed to offer high performance and long service life. The choice of PVC-U, a material highly resistant to corrosion and chemicals, makes it ideal for a wide range of applications, even in particularly aggressive environments.

Key features:

Robust construction: Made of high-quality PVC-U, the filter ensures a robust and impact-resistant construction.

Flanged top opening: This feature facilitates the installation and maintenance of filter cartridges, enabling quick and easy replacement.

EPDM gasket: The EPDM gasket ensures a perfect seal, preventing leakage and guaranteeing optimal operation.

Breather valve: The breather valve allows air to be removed from the system, improving filtration efficiency.

Pressure gauges: Inlet and outlet pressure gauges allow the water pressure to be constantly monitored and the filter to be checked for proper operation.

Drain valve: The drain valve facilitates cleaning and maintenance of the filter.

PED compliance: The filter complies with the European Directive 2014/68/EU for pressure vessels, ensuring maximum safety during use.
