Product description:

Osmosea Proportional Dosing System

Automatic proportional dosing system for in-line dosing of sterilising substances.

This is automated equipment designed to inject a precise and proportional quantity of a chemical substance (steriliser, biocide, etc.) into a flow of water. The peculiarity of this system lies in its ability to adapt the dose administered according to the water flow rate, thus guaranteeing constant and effective treatment, regardless of flow variations.

Technical characteristics:

Constant/proportional dosing;

Level control;

Optional level alarm output;

Multifunctional programming (Constant, Divider, Multiplier)

Maintenance dosage setting in case of system downtime;

Pause-Work mode: cyclic dosing can also be adjusted by an external contact.
