Product description:

Dometic MagicWatch MWE 4104 Blind spot visibility

Dometic MagicWatch MWE 4104: Blind spot visibility for safer driving

The Dometic MagicWatch MWE 4104 is an innovative system designed specifically to improve blind spot visibility in commercial vehicles. Thanks to this solution, truck drivers can approach manoeuvres more safely, significantly reducing the risk of accidents caused by hidden obstacles.

How does it work?

The system is equipped with four strategically placed sensors that constantly monitor the area around the vehicle. When an object, such as a pedestrian or cyclist, approaches the blind spot area, the sensors send a signal to the system, which in turn triggers a visual and audible alarm to warn the driver of the impending danger.

Key features:

Compact size: With its small size (20x54x70 mm) and low weight (0.75 g), the system can be easily integrated into any type of commercial vehicle.

Flexibility: It works with both 12V and 24V voltages, adapting to different electrical configurations.

Discreet design: The black colour makes it inconspicuous, blending perfectly into the design of the vehicle.

Easy installation: The kit includes everything needed for quick and uncomplicated installation.

Dometic MagicWatch MWE 4104: Blind spot visibility for safer driving

The Dometic MagicWatch MWE 4104 is an innovative system designed specifically to improve blind spot visibility in commercial vehicles. With this solution, truck drivers can approach manoeuvres with greater

Reliability: Designed to withstand the most demanding conditions, ensuring optimal operation over time.

Technical specifications Dometic MagicWatch MWE 4104:

Length: 20 mm

Height: 54 mm

Width: 70 mm

net weight: 0.75 g

colour: black

voltage: 12/24 V
