MASE MARINER 1050 T THREE-PHASE MARINE GENERATOR 11,2KVA

MASE MARINER1050T Three-phase marine generator equipped with YANMAR 3TNV80F engine with Diesel power supply, able to deliver a maximum power of 11,2KVA, **complete with AVR.**

The MASE MARINER1050T marine generator is built with and air-cooled, self-excited synchronous alternator, it is extremely compact, suitable even on small boats.

The MASE MARINER1050T alternator is a 4-pole synchronous, self-regulated, self-excited, brushless, which in conjunction with the YANMAR engine can deliver a maximum power of 11.2KVA. The rotor and the stator are coated with epoxy paint to prevent the attack of atmospheric agents, in addition it is equipped with safety systems of self-stop in case of high temperatures detected on the windings. The alternator is complete with AVR voltage regulator that ensures the stability of the voltage delivered by the generator, delivering current like the home one.

The control panel of the marine generator MASE MARINER1050T has been designed in order to reduce, in a single panel, the commands, controls and protections. The elements that compose it are:

- Engine protection module for automatic shutdown in case of high water temperature, low oil pressure, high alternator temperature;
- Hour meter;
- Circuit breaker for protection in case of overload or short circuit;
- Thermal circuit breaker for protection of DC circuit.
