

MASE MARINER 810 SINGLE PHASE MARINE GENERATOR 8.8KW EPA

Product description:

MASE MARINER 810 SINGLE-PHASE MARINE GENERATOR 8.8KW EPA

MASE MARINER810 single-phase marine generator is equipped with a YANMAR 3TNV80F engine that complies with EPA regulations, powered by diesel capable of delivering a maximum power of 8.8 KW at 1800 rpm.

The marine generator MASE MARINER810 is built with and synchronous alternator, self-excited with air cooling, it is extremely compact and powerful, suitable even on small boats.

The alternator of the MASE MARINER810 is synchronous with 4 poles, self-regulated, self-excited, brushless, which in combination with the powerful YANMAR engine can deliver a maximum power of 8.8 kW. The rotor and the stator are coated with epoxy paint to prevent the attack of atmospheric agents, in addition it is equipped with safety systems of auto stop in case of high temperatures detected on the windings.

The cooling of the engine of the generator MASE MARINER810 happens through circulating coolant in closed circuit. The system is composed of a cupronickel exchanger, inside of which the heat exchange between coolant and sea water takes place. Two separate pumps provide for the circulation of the coolant and seawater in the generator MASE MARINER810.

The MASE MARINER810 marine generator is **EPA certified** and is valid only **for the US market**.
