Product description:

FINI MICRO COMPRESSOR 4.0-08-200

FINI MICRO COMPRESSOR micro fini rotary screw with oil-injected belt drive.

Tank mounted version with fixed speed.

FINI 4-5.5 KW version: star/delta starter, with ETMII electronic controller managing the entire machine operation.

High energy savings

High-efficiency IE3 motors, combined with high-performance screw units, cut energy-related costs. In addition, IE3 motors reduce CO2 emissions-an important contribution to environmental protection.

Plug&Play

Fin and Plus compressors are fully factory tested so they can be delivered ready for immediate use, saving installation time and costs.

Low noise levels

Fin and Plus compressors are very quiet: the use of efficient soundproofing materials makes them suitable for installation even close to the workstation.

High reliability

Quality control and the use of components from world-leading manufacturers ensure a long service life and long maintenance intervals.

High productivity

Making a product that ensures high performance is of paramount importance to Fini micro right from the design stage. The Micro and Plus ranges also follow this philosophy.

Compact design

The extremely compact design of these micro fini compressors allows installation close to any work environment.

The MICRO FINI 4.0-08-200 compressor is an excellent choice for companies looking for an efficient, reliable and quiet compressor.

The MICRO FINI 4.0-08-200 compressor is perfect for applications requiring high productivity, such as painting or tire inflation.

"The compact design of the MICRO FINI 4.0-08-200 compressor makes it easy to install and move.

The MICRO FINI 4.0-08-200 compressor can supply compressed air at a pressure of 8 bar, ideal for a wide range of applications.

The 580 l/min air flow rate of the MICRO FINI 4.0-08-200 compressor allows multiple air tools to be fed at the same time.

The MICRO FINI 4.0-08-200 compressor's 60 dB(A) noise level makes it ideal for installation in quiet work environments.
