

# HONDA HSS 1380i Snowthrower Hybrid Engine with Tracks

**Product price:**

**5.784,23 € tax excluded**

## **Product description:**

HONDA snowplow HSS1380i 7,6kW

The HONDA HSS1380i is an innovative snowplow capable of summoning 7,6kW of power intended for areas where snowfall is the order of the day.

Honda's 4-stroke iGX focuses on devouring snow at a phenomenal rate while charging a powerful battery. This battery drives two powerful electric motors that provide stable independent drive to the tracks. Imagine two tennis courts covered in a foot of snow. The 7,6kW HONDA HSS1380i hybrid snowplow shovels all the snow away in less than six minutes, so you don't have to worry about a thing when there's a storm coming.

A robust 4-stroke iGX engine is the heart of the hybrid snowplow. Its sole purpose is to power the tiller, focusing its power on swallowing massive amounts of snow and throwing it as far away as possible. The HONDA HSS1380i is also intelligent and can sense the highest snow resistance, with automatic adjustment to run at an optimal speed.

Two robust electric motors provide traction and save fuel. These two electric motors operate independently of the combustion engine and are so quiet that you can operate the hybrid snowplow even in the early morning hours without waking anyone up.

An on-board diagnostic system, complete with gauges, can detect warnings during startup and operation. It can also monitor battery charge and adjust performance between the drive system and the tiller. In fact, it's so smart and easy to use that if we gave it the word, too.... well, maybe it could happen in the future.

The 7,6kW HONDA HSS1380i snowplow has it all: state-of-the-art technology, fuel efficiency, low noise and exceptional shoveling performance. With three different driving modes, it offers confident control even for beginners.

This HONDA HSS1380i 7,6kW hybrid snowplow comes with a unique hour meter feature, which through intelligent self-diagnostics tells you when your next service is due and when routine maintenance needs to be performed instead. Aren't these the things that make you feel good?

#### HONDA HSS1380i 7,6kW TECHNICAL FEATURES

Output: 7,6kW  
Fuel: Gasoline/Electric  
Engine: Honda GXV 390  
Starting system (AMP): Manual recoil starter  
Working width: 810 mm  
Working height: 510 mm  
Maximum capacity: 65 t/h  
Maximum jet distance: 17 m  
Jet direction adjustment: 2 electric stages  
Transmission: Electric motors  
Traction type: Tracks  
Consumption: 2.56 Lt/h  
Acoustic power: 104 dB(A)  
Length: 1560 mm  
Width: 815 mm  
Height: 1155 mm  
Weight: 168 Kg  
Speed (km/h): 0-2.88

Are you looking for a snowplow with different characteristics? [HERE](#) you can find the full range of Honda products and other specialized brands.

#### **Product features:**

Fuel: Gasoline  
Engine: Honda GXV390, 4 tempi  
Engine rpm (rpm): 3600  
Ignition: Recoil  
Starting system: Manual  
Working width (mm): 810  
Working height (mm): 510  
Capacidad máxima (t/h): 60  
Speed (Km/h): 0-2.88  
Throwing distance (m): 17  
Discharge chute adjustment: 2 power stages

---

Transmission: Electric engines  
Clutch of steering: Yes  
Screw height adjustment: Electrical  
Net power (kW): 7.6  
Fuel tank capacity (L): 6.4  
Consumption (L/h): 2.56  
Running time (h): 2.5  
Acoustic power: 100 dB(A)  
Length (mm): 1560  
Width (mm): 815  
Height (mm): 1155  
Dry weight (Kg): 168  
Traction type: Track laying  
Engine manufacturer: Honda
