Product description:

MOSA GE S-5000 HBM SINGLE-PHASE GENERATOR 5KVA STAGE V

The MOSA GE S-5000 HBM single-phase generator is equipped with a Honda GX 270 StageV petrol-powered engine, and is complete with a capacitor voltage regulator (AVR Optional).

The MOSA GE S-5000 HBM generator has a low fuel consumption, in fact it consumes only 1.6 liters / hour at 75% of the load for an autonomy of up to 12.5 hours of operation.

The generator front panel is configured as follows:

- Fuel tap
- Fuel level indicator
- Multifunction digital instrument: Voltmeter Frequency meter Total hours counter Partial hours counter (resettable)
- Magnetothermic switch
- Clamp (PE)
- 12 Vdc output sockets (battery charger)
- 12Vdc output protection fuse

STAGEV EMISSIONS REGULATION

The generating set is equipped with a "mobile" STAGEV motorization, as required by the European Regulation 2016/1628. These new engines make it possible to exponentially reduce the emissions of particulate matter and nitrogen oxides delivered by the generator into the environment, and ensure a reduction in the environmental impact of 200% compared to standard engines.
