Product description:

TELECO VOYAGER DIGIMATIC65 SATELLITE ANTENNA 65 cm

TELECO VOYAGER DIGIMATIC65 is a satellite antenna expressly designed and manufactured by TELECO to allow the user to manually point to the desired satellite with a few simple and fast maneuvers.

Currently, the main difficulty in pointing to a satellite transmitting digital TV signals is linked to the fact that the digital signals are displayed on the TV screen with a certain delay in addition to the latency of LCD TVs and therefore the user is forced to perform the pointing with very slow movements so as not to risk passing in front of the satellite without noticing it.

The TELECO VOYAGER DIGIMATIC65 is the solution to this problem. In fact, it is equipped with an electronic elevation meter that provides on the display the real absolute value of the inclination of the dish, even with the vehicle not leveled.

The electronic elevation meter indicates both the elevation and the signal strength. This allows you to quickly point this manual dish system at the desired satellite without the disadvantages of delay.

The TELECO VOYAGER DIGIMATIC65 has the transmission capabilities managed by the geostationary satellite of reference placed at 13 degrees East which ensures a wide coverage originating in central Europe.

TELECO VOYAGER DIGIMATIC65 has a directly proportional correlation between its diameter and the signal strength at the edges of the "footprint".

Tendentally it is not recommended to install an antenna of excessively large diameter on a motorhome, which is why the standard is around 80 cm in diameter.

The coverage thanks to the TELECO VOYAGER DIGIMATIC65 is very wide starting from the center of Europe. The signal degrades away from the center of Europe. As you can see in the

map with TELECO VOYAGER DIGIMATIC65 you can receive the signal of HotBird (which transmits SKY and TIVUSAT) practically throughout Europe, the north of Morocco, Algeria, Tunisia giving you satellite coverage in any place you decide to stay.

TECHNICAL FEATURES TELECO VOYAGER DIGIMATIC65

Type of orientation: Manual
Type of attachment: Wall bracket
Antenna diameter: 650 mm
Bracket size: 33 cm, 52 cm
Pointing kit: DSF90E/HD
Length: 650 mm
Width: 40 mm
Height: 650 mm
Weight: 9.2 kg

Looking for a product with different features? Here you can find the whole range of TELECO and other specialized brands.

Product features:

Diameter (Ø): 65 cm
Length closed (mm): 880
Width closed (mm): 650
Height closed (mm): 180
Length (mm): 650
Width (mm): 400
Height (mm): 650
Type of coupling head: Wall bracket
Product type: Satellite Antenna
Antenna orientation: Manual
Satellites Number: 8
Weight (Kg): 9.2
