Product description:

TELECO VOYAGER G350 SATELLITE ANTENNA 50 cm

TELECO VOYAGER G350 is a satellite antenna equipped with a graduated scale on the pole that allows you to set very quickly the inclination of the pointing of the dish, while remaining inside the vehicle.

For a correct choice of the inclination it is important that the vehicle is well leveled (in bubble), otherwise it is necessary to add or subtract to the value of the inclination of the dish the height difference of the vehicle.

After setting the inclination, simply rotate the TELECO satellite antenna to the south by means of the pole inside and, while observing the TV, optimize the pointing.

The TELECO satellite antenna has the transmission capabilities guaranteed by the geostationary satellite of reference placed at 13 degrees East which ensures a wide coverage that originates in central Europe.

TELECO VOYAGER G350 has a directly proportional correlation between its diameter and the signal strength at the edges of the "footprint".

Tendentially it is not recommended to install an antenna of excessively large diameter on a motorhome, which is why the standard is around 80 cm in diameter.

The satellite signal is transmitted by a geostationary satellite located at 13 degrees East. The coverage is very wide starting from central Europe. The signal degrades as you move away from the center of Europe. The larger the diameter of the satellite antenna, the more the signal can be received at the edges of the footprint.

As you can see in the map with TELECO VOYAGER G350 it is possible to receive the signal of HotBird (which transmits SKY and TIVUSAT) practically in all of Europe, the north of Morocco,

Algeria, Tunisia.

TECHNICAL FEATURES TELECO VOYAGER G350

Type of orientation: Manual
Type of attachment: Wall bracket
Antenna diameter: 500 mm
Bracket size: 33 cm, 52 cm
Length: 500 mm
Width: 40 mm
Height: 500 mm
Weight: 6.7 kg

Looking for a product with different characteristics? Here you can find the full range of TELECO and other specialized brands.

Product features:

Diameter (Ø): 50 cm
Length closed (mm): 650
Width closed (mm): 500
Height closed (mm): 170
Length (mm): 400
Width (mm): 500
Height (mm): 500
Type of coupling head: Wall bracket
Product type: Satellite Antenna
Antenna orientation: Manual
Weight (Kg): 6.7
