

TELECO TELAIR Teleplus X2 /110VU

Product price:

191,00 € tax excluded

Product description:

TELEPLUS X2/110VU

Double Polarity

High gain 38 dB (with amplifier)

This antenna has been designed and built starting from the experience and the great success obtained in recent years with the antenna TELEPLUS.

Great care has been dedicated to the increase of the gain curve obtaining an even greater sensitivity for weaker signals.

The introduction of the POLARITY ORIENTATION MECHANISM also allows you to receive with maximum performance all TV signals (Digital and Analog) transmitted in both HORIZONTAL and VERTICAL polarity (With the advent of digital transmissions the VERTICAL polarity signals have increased in some countries such as Italy and England).

A low noise amplifier with adjustable gain operating at both 12 and 230 Volts is supplied.

Equipped with LTE filter suppressor to eliminate any noise generated by the new Smartphone 4G. (Only for countries that have already incorporated the transmissions LTE @ 800MHz).

Images and technical data are not binding.

Product features:

Type of coupling head: Wall bracket

Product type: Digital Terrestrial Antenna

Antenna orientation: Manual

Satellites Number: No (Digital)
