

TELECO TELAIR TELEPLUS

Product price:

119,00 € tax excluded

Product description:

Directive Antenna for 36dB Digital Terrestrial Signals

Cutting-edge technology combined with new automatic assembly techniques are at the origin of this new electronic antenna, which we have called TELEPLUS because it is "PLUS" in everything.

High gain and therefore more possibility to receive even very weak signals.

High directivity to suppress all the disturbances generated by signals reflected by natural obstacles such as trees, houses, mountains, etc..

Equipped with LTE filter suppressor to eliminate any noise generated by the new Smartphone 4G. (Only for countries that have already incorporated LTE transmissions on the 800MHz band).

Images and technical data are not binding.

Product features:

Lenght closed (mm): 505

Width closed (mm): 700

Type of coupling head: Wall bracket

Product type: Digital Terrestrial Antenna

Antenna orientation: Manual

Satellites Number: No (Digital)

Weight (Kg): 1.9
