Based on the rugged Fischer Panda 60-4PMS generator set, these heavy duty (HD) versions operate at 1500 rpm / 50Hz.

The Fischer Panda 60-4PMS generator is enclosed in a super quiet soundproofed capsule.

The generators are heavier than standard PMS generators. They use a heavy-duty diesel engine and because they run at 1500 rpm, they have a 4-wire coil, which also means that the alternator has a heavier 4-pole construction.

The heavy-duty construction and low rpm results in a durable and quiet generator set.
